

Cardinal Health™ Incontinence Products Truly breathable

The microbiome: A delicate balance

We all have flora on our skin. But when skin flora is out of balance due to excessive heat and moisture, it can lead to serious skin problems — especially for those receiving care for incontinence.

Introducing BreatheEasy™ technology

The fully breathable line of incontinence products from Cardinal Health allows you to BreatheEasy™ by promoting an optimal skin balance that helps keep skin flora at a healthy level.

Our full portfolio of Underwear, Adult Briefs and Premium Underpads with BreatheEasy™ technology are cooler and more comfortable, resulting in a more balanced microclimate for improved skin health.

For skin. For dignity. For life.

Underwear with BreatheEasy™ technology

Breathable underwear

SURE CARE™ Ultra and SURE CARE™ Super underwear deliver maximum protection with comfort and dignity.
